

# PRUNING

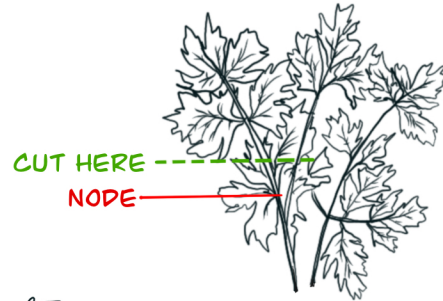

PRUNING PLANTS HELPS THEM GROW HEALTHIER AND STRONGER. IT'S IMPORTANT TO PRUNE PLANTS IN OUR HYDROPONIC GARDEN TO ENSURE PLANTS GROW WELL AT A SIMILAR RATE. THE PLANT LIGHT NEEDS TO STAY AROUND 4 INCHES ABOVE PLANTS. IF SOME PLANTS GROW FASTER THAN OTHERS, IT MEANS THE SLOWER GROWING PLANTS WILL NOT RECEIVE THE NEEDED AMOUNT OF LIGHT.

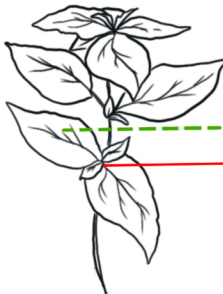

**DANDELION**  
CUT OFF WHAT YOU NEED  
STORE IN FRIDGE  
AND LET THE REST GROW

**ARUGULA**  
CUT OFF WHAT YOU NEED  
STORE IN FRIDGE  
AND LET THE REST GROW

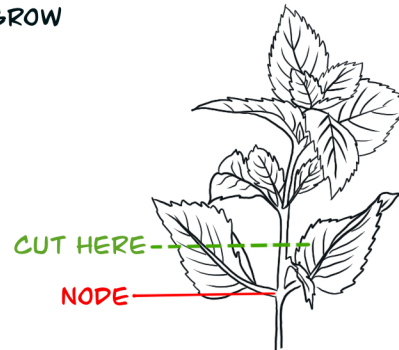

**CILANTRO**  
PRUNE CILANTRO BY  
CUTTING STEM DOWN  
LEAVING AT LEAST  
ONE NODE

**BASIL**  
PRUNE BASIL BY  
CUTTING STEM DOWN  
LEAVING AT LEAST  
ONE NODE

TO USE FRESH CILANTRO, MINT, OR BASIL,  
CUT OFF LEAVES TO USE IMMEDIATELY  
OR STORE IN FRIDGE FOR LATER

**MINT**  
PRUNE MINT BY  
CUTTING STEM DOWN  
LEAVING AT LEAST  
ONE NODE
